HOMASOTE® TO EXHIBIT AT BOOTH #1133 AT THE GREENBUILD INTERNATIONAL CONFERENCE AND EXPO ON NOVEMBER 19-21

*440 SoundBarrier Recently Approved for CHPS Certification and Added to
Low-Emitting Materials List*

WEST TRENTON, NJ – November 10, 2008 – Homasote®, the leading manufacturer of quality building products made from recycled materials, will exhibit its versatile product line at the U.S. Green Building Council's Greenbuild International Conference and Expo, one of the most significant tradeshow events in the building industry, November 19-21 at the Boston Convention and Exhibition Center in Boston, Massachusetts.

Striving to enhance the nation's environmental practices, the Greenbuild International Conference and Expo enables green building industry professionals such as architects, building owners, contractors, developers, educators, product manufacturers, schools, universities, students, urban planners and more to network with other green building peers while sharing ideas about the green building movement. Homasote products help provide its customers with an opportunity to earn points toward the USGBC's Leadership in Energy and Environmental Design (LEED) program.

"Being an environmentally-friendly company for nearly 100 years, we strive to provide our customers with quality building products," said Warren Flicker, CEO of Homasote. "We are honored to be a part of such a prestigious industry event."

Additionally, Homasote's 440 SoundBarrier® products were recently approved for Collaborative for High Performance Schools (CHPS) Certification and will now also be listed on the Low-Emitting Materials (LEM) Table on the CHPS website. The certification allows Homasote's 440 SoundBarrier products to be used for application in a classroom environment including bulletin boards, finished wall panels, furniture component and sound control for floors and walls.

Homasote has been providing the building industry with quality building products and will be celebrating their 100th anniversary in 2009. Their products are made from post-consumer recycled paper making them the leading manufacturer of green building products in the United States. For more information, please visit www.homasote.com.

###

About Homasote®

Homasote® is the leading manufacturer of green building products made from recycled materials in the United States whose brand embodies an array of uses and products specific to sound control in floors and walls, tackable board, fire protection for roofs and industrial packaging. Homasote® products provide green benefits as they are made from post-consumer recycled paper, biocide to ensure a healthy environment by inhibiting mold and wax emulsifiers for water resistance. For nearly 100 years, Homasote® has provided quality building products made from recycled materials to the building industry. For more information, please visit www.homasote.com.
