GREEN UP CONCRETE SALES with HOMEX® 300

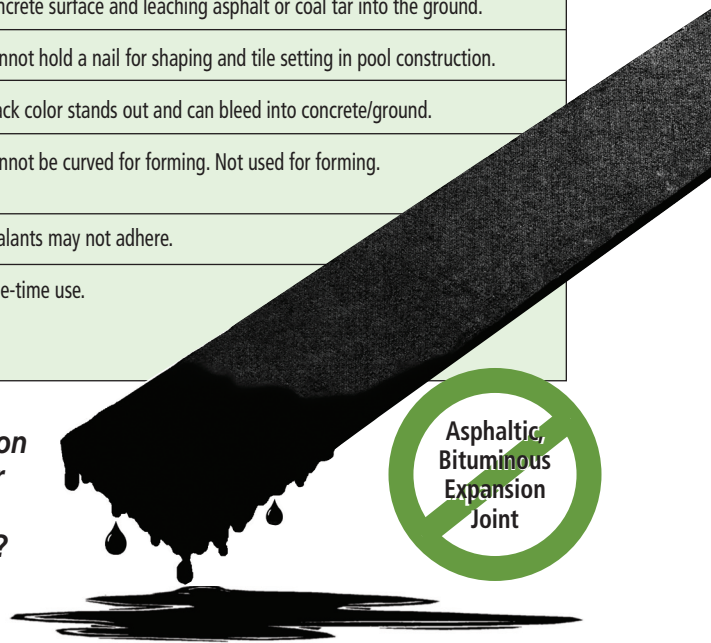

The world's cleanest, bendable, environmentally friendly, expansion joint and forming material.

Bar-coded and bundled in 10' strips.

Compare HOMEX® 300...	...with Impregnated Expansion Joint
Environmentally safe for you and for your customers. Non-bituminous. The world's only "Green" expansion joint, made from recycled, environmentally-friendly Homasote®.	Bituminous or asphaltic.
Tough, strong and flexible. Available in 5' and 10' lengths.	Breaks easily. Cannot be stocked or sold in 10-foot lengths.
No petroleum or kerosene odor. VOC-compliant. Homasote® has 98% recycled paper content, clean and gray throughout.	Smells unpleasant. Messy, sticky and smeary. Asphalt or coal tar base can get on hands and clothes.
Dimensionally stable. Effective in all weather. Reduced tripping potential in hot weather.	Extrudes in hot weather, often forcing joints above concrete surface and leaching asphalt or coal tar into the ground.
Won't split or splinter and can hold a nail for pool shaping and tile setting.	Cannot hold a nail for shaping and tile setting in pool construction.
Blends with concrete for a professional finish.	Black color stands out and can bleed into concrete/ground.
Curves, even into complete circles in 10 ft. strips, for forming. Easily removed without releasing oil.	Cannot be curved for forming. Not used for forming.
Compatible with all sealants.	Sealants may not adhere.
DoubleDuty™. Form or screed. Straighten it out for the next forming, screeding or expansion joint project.	One-time use.

Which expansion joint is better for your environment?
